

EDUCATION

COMMUNITY SCHOOL:

Construction on our community school in Mwandu began in 2016 and is ongoing with help from numerous donors. All volunteers are invited to help out at the school, to spend time with the children or to help the teachers. As English is the official language of Zambia, the teachers welcome help from all English speakers. As of January 2021, the school has a student body of over 280 children, ranging from preschool to 3rd grade. Construction on the 4th grade branch of the school began in April 2021, and we hope to continue building the school to accommodate students up to 9th grade. The community school is in high demand, as there is only one other primary school in Mwandu, which is built for 350 students and currently accommodates over 1,000. Whether teaching or helping with construction, your help is greatly needed and appreciated to keep this school growing for the children of Mwandu.

SPONSORSHIPS:

We sponsor college students from the village with funds from donors, who have contact with the students they sponsor, along with photos and full disclosure on where their funds are spent. Giving students from Mwandu the opportunity for further education can help their hometown from the roots up, allowing them to become a self-sustainable community.
